

"The Embryo in Us"

A Rare Opportunity Live Seminar

Honoring the Remarkable Phenomenological Work of

Jaap van der Wal, MD, PhD

Thursday to Sunday,
June 6th to 9th, 2024

Dr. Jaap van der Wal, MD, PhD, a renowned embryologist and morphologist from Maastricht, Holland, delves into the intricacies of human prenatal development, demonstrating how biology serves as a manifestation of the fundamental unfolding of human spirituality.

At this extraordinary gathering, Dr. van der Wal will unveil the intricate mechanisms that govern the shaping of the human body during its gestational journey. He will illuminate how these early developmental processes hold profound insights into the essence of human spiritual development.

" The body develops out of us, not we from it. We made the body, cell by cell we created it " - Rumi

HIGHLIGHTS

- The embryological forces shaping the body remain active throughout the entire lifespan (the embryo in us is not a past but current).
- The developmental gestures of the human species constitute a profound intersection of biography and biology.
- This seminar explores a dynamic embryology and morphology in the pursuit of understanding the presence of the soul (mind) both within the womb and within our bodies.

VENUE

The Museum of Ethnography,
Djurgårdsbrunnsvägen 34 / Museivägen 7,
Stockholm, Sweden

" a bridge between
science and spirituality
... the embryo does not
have a soul, it **IS** soul! "
